HIGH-PERFORMANCE TEAM · HOW TO PLAY

Seven weeks. Five days a week. Six features (A–F) to deliver before **week 7 closes**. You commit all five days *before* you know what is coming, resolve them together, then close the week. From week 2, Events crash into the plan you already made. Everything is **cooperative**: the five Activity cards are the **team's** - nobody plays one. Deliver everything with a Team Score of **88+** and you did not only finish the project, you built a team that could do it again.

SET UP · ABOUT FIFTEEN MINUTES

1. **Deal and build.** Each player is dealt five habitus parts at random - **Base, Legs, Torso, Head, Item** - and slots them into the seats on their person board (the **SPECIMEN**). Nobody chooses.
2. **Take your tiles.** The **NEED** tile that names your Torso and the **HERO** tile that names your Legs.
3. **Start square.** Mark one square on your **SKILLS** grid: where your **Head's row** (education) meets your **Item's column** (skill). Then put a tile on the same square of **THE ZONE** (stacked face up if two of you start on the same square).
4. **Pick a Project card**, turn **THE PROJECT** face up and seat it. It names features A–F. Read their cost, complexity and locks: **D** and **F** cannot be placed until what they sit on is built.
5. **Motivation 3** and **Capital 0** for everyone. Week marker on 1. Shuffle the Events, do not draw yet.
6. Only **THE PROJECT** and **THE ZONE** start face up. **SHIT HAPPENS** and **THE TEAM** stay text side up; they turn over in week 2.

YOUR PERSON BOARD

- **Habitus seats** - who you are. Nothing is written down: the figure is the record.
- **Zone Start / SKILLS grid** - your own 5×5: education rows × skill columns. A counter in a square means you can do that. Item diamonds sit below the grid, Head hexagons beside it.
- **Hero** (under Legs) - once a game, cancel an Event that names your Pressure Response. +2 Capital to you, +1 Motivation to another. Needs 3 Motivation.
- **Need** (under Torso) - from week 2, +1 Motivation if your Torso's condition was met this week.
- **Flex** - the marker for a day you worked as Overtime and owe back.
- **Motivation** (5 squares, starts 3) and **Capital** (0–5, a marker you slide, only grows when the team witnesses it). **THE WEEK** checklist is printed down the side.

THE WEEK · SEVEN STEPS, EVERY WEEK

1. **PLAN** - lay **five** Activity cards, Monday to Friday. Nothing resolves. A slot may take the **Flex** marker instead (Overtime, see page 2).
2. **SHIT HAPPENS** *(week 2 on)* - draw **2 Events**, read them out. Nothing resolves yet.
3. **ADAPT** - cancel Events by paying each one's **Adaptability cost** (1, 2 or 3) in adapt tokens, or play a Hero. A Habit takes 1 off the cost (minimum 1).
4. **SURVIVING EVENTS HAPPEN** - resolve every Event nobody cancelled.
5. **THE WEEK RUNS** - resolve the five cards in **any order**. The week happened at once.
6. **CLOSE** - **bank** finished features (lift any lock, pay Capital to who worked on it) → **walk the Ledger**, at most one step per track → add this week's **adapt tokens** to the pool (Align, Workshop, Reflect; cap 6).
7. **MOTIVATION** - the **grind**. One net number per character: **−1** for the grind, ±1 per Event category your Torso is hit by or immune to, **+1** if your Need was met. Apply it, **then** anyone on 0 **quits**. This is the only moment a quit is checked. Move the week marker.

WEEK 1 IS ONLY STEPS 1, 5, 6 AND 7. Lay five cards from **Work, Coordinate, Celebrate**, resolve them, bank anything finished, take the grind. No Events, no Ledger, no Needs yet. *A week is five days and you choose them - that is the entire idea.*

WHAT OPENS, AND WHEN

WEEK	WHAT TURNS UP
1	The week. Work, Coordinate, Celebrate.
2	**THE TEAM** turns over: Trust, Capability, Shared Practice, Standing, Capital, Needs, the adapt pool (starts at 2 tokens), Shit Happens and Adapt.
3	**THE DEVELOPMENT** (Learn/Teach payoff), Flex and Overtime. Now also Learn, Align, Reflect, Workshop, Plan, Demo.
4	Nothing new. Play everything you have met.
5	**Combos**: two named triggers in the same week pay a small bonus (one combo a week).
6–7	Nothing new. The project ends when week 7 closes.

Turn over for the cards, the Zone and the score →

HIGH-PERFORMANCE TEAM · HOW TO PLAY

THE ACTIVITIES · ONE CARD = ONE DAY

The cards belong to the team. Nothing here is "may": if a number is not listed, nothing happens.

CARD	EXACT EFFECT
Work	**+1** to one feature's Work counter (Capability changes it; never below 0). Not on a feature whose dependency is not yet banked.
Plan	Pick a feature: every Work card on it this week gives **+1 extra**. High complexity: also next week.
Coordinate	**+1 Trust.**
Align	**+1 adapt token**, no conditions.
Workshop	**+1 adapt token**, no conditions.
Reflect	Needs **Trust 3+**. +1 adapt token. If a feature was banked or you adapted to 2 Events, also **+1 Shared Practice**.
Learn	The team names one character: they mark a free square **left or right** of one they cover, in their own row. Then tile the Zone. No Capital.
Teach	Up to **two** teachers; each lets one other character mark a square **up, down, left or right** of one the teacher covers, any row. Then tile the Zone. **Both teachers +1 Capital.** Dead while Trust ≤ 1.
Demo	Needs Capital ≥ the team average. The team names one character: **+1 Capital**. The feature ignores the next Negative Feedback.
Celebrate	**+2 Motivation to everyone** (cap 5) - **+3** if a feature was banked this week.

Overtime. A **sixth** card the team may lay: one character pays **1 Motivation** and takes the Flex marker, and the team owes that day back later. Unrepaid Flex costs **2** at scoring.

NEEDS · FROM WEEK 2

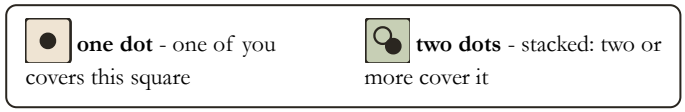

At step 7 you get **+1 Motivation** if your Torso's Need was met this week. Each also counts as met while the team holds its Habit.

Autonomy	No Event landed on the team.
Hierarchy	The team played a Teach.
Community	The team spent a Coordinate, Reflect or Celebrate.
Quality	Work was added to a feature. **Otherwise −3.**
Recognition	A feature was banked, or you spent your Hero.

THE ZONE · TWO THINGS EVERY TIME

Whenever someone **Learns** or is **Taught**, do two things, in this order:

1. **`Mark it on the SPECIMEN`** - a counter on that character's own SKILLS grid. The coloured face means "new this week": it cannot be taught until the week closes.
2. **`Cover it on THE ZONE`** - no tile there? Put one down. A tile already there? **`Flip it.`**

Counters are never taken off and tiles never flip back. Your sheet is the record of *what I can do*; the Zone is the team's picture of the same squares. Everyone can read everyone's sheet.

THE LEDGER READS THE ZONE	
Capability +1	A whole **row or column** of the Zone now has a tile on every square.
Shared Practice +1	A tile **flips to stacked** - two of you now cover the same square.
Cross-Trained	Your own SKILLS grid has squares in a **3rd row**: **+1 Capital**, once each.

THE LEDGER AND MOTIVATION

- **Trust, Capability, Shared Practice** - coins on THE TEAM (scale 0–5), one step a week each. A coin that reaches its ring turns into a **Habit**: it makes one Event category cheaper to cancel, and satisfies a Need.
- **Adaptability** is a shared pile of tokens (cap 6). Spend them in step 3.
- **Capital** is earned, never given: banked work, a Demo, a Teach, a Hero, Cross-Trained. Rich in Capital = standing in the team.
- **Motivation** is personal. The grind takes 1 every week; Celebrate and a met Need give it back. **At 0 you quit** and the team scores −10.

HOW IT ENDS · SCORING

`TEAM SCORE` `= features banked × 10 + (Trust + Capability + Shared Practice + adapt tokens, max 21) + all Motivation − 10 × quits − 2 × unrepaid Flex`

Checked when week 7 closes. 88 = 68 + 5 for every character you started with.

Failure	Not all six features banked. The score does not matter.
Heroic Success	All six, score under 88. The project made it. The team did not.
High Performance	All six, score 88+. **You built a team as well.**

If you only had thirty-five working days, how would you spend them?
